

# iOmniscient IQ Suite of Multi-Sensory Analytics

Optimizing Multi-Sensory Data Capture for Behavioral and Environmental Insights

iOmniscient provides AI-based Multi-Sensory Analytics for video, sound and smell to better replicate human reasoning and was recently named Intel's Alliance Partner of the Year for APJ. These proven technologies have been implemented by commercial and government users in 70 countries. iOmniscient specializes in addressing complex, extremely crowded and dynamic, real-time environments. Unlike similar solutions, iOmniscient is packed with privacy protected applications for over 300 end-to-end use cases across 30 industries and through improving protocols by teaching itself, can do more with less data. As such, iOmniscient is designed to be easily integrated with a low Total-Cost-of-Ownership.

## Key Features

				
Multi-Sensory Analytics	End-to-End Solutions for Complex Use-Cases	Facial Analytics in a Crowd	Multi-Lingual License Plate Recognition	Autonomous Response

### Vertical:

- Agriculture
- Banking/FSI
- Education
- Energy
- Government
- Health & Life Sciences
- Hospitality
- Retail
- Manufacturing
- Transportation

### Use Cases:

- Autonomous Response
- Situational Monitoring
- Asset & Operations Optimization
- Marketing and Advertising
- Safety and Security

### Country/Geo:

Global
