

Neuroo Platform

Making Security Systems Smart with Actionable Data

Neuroo's real-time analytics and alerting system enables customers to leverage the full potential of their video data by transforming it into actionable insights. Powered by AI, Neuroo can help optimize operations, accelerate anomaly investigations, drive data-based decisions, and facilitate the daily management of operating activities. The Neuroo platform incorporates image, video, character analysis and more to provide a comprehensive understanding of operations. Capable of analyzing large amounts of data streams simultaneously regardless of their source or input format, the Neuroo platform is designed to be secure, robust and scalable, offering numerous deployment possibilities across wide range of use cases.

Key Features

Customizable Features and Functionalities

Flexible, CPU-Based Architecture

Real-Time Event Detection and Alerts

Vertical:

- Government
- Defense
- Retail
- Industrial

Use Case:

- Safety & Security
- Situational Monitoring
- Assets & Operations Optimization

Country/Geo:

Western Europe, North America, Africa
